New millennium technologies...

Auto-RACK!

Patent Pending!

The Rack-Carousel wash systems are suddenly given new life in a new millennium!

This is the most innovative concept for rack dishwashing since the invention of hot water! The drive system features an ultra-extended warranty and one look tells you this is a whole new millennium for rack conveyors.

The heavy-duty 12 gauge stainless conveyor sections are engineered to be very strong and provide many decades of maintenance free service.

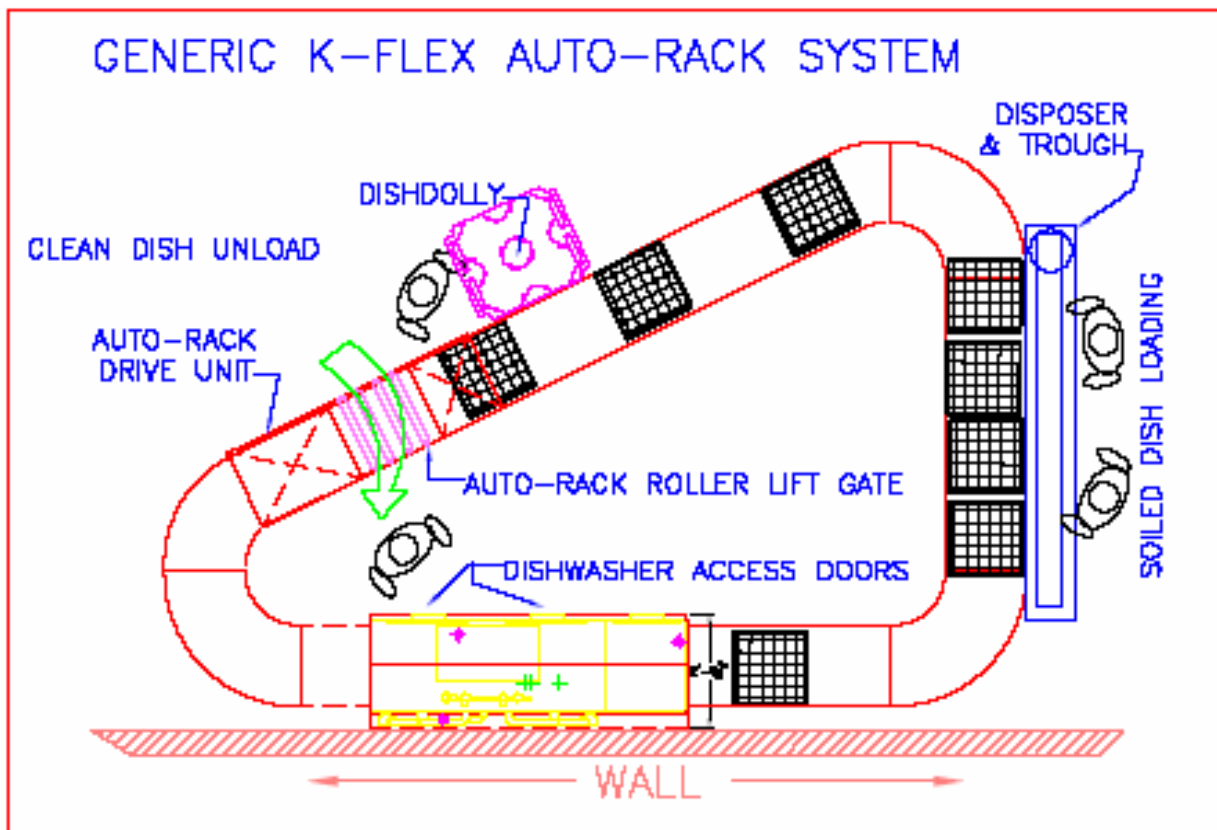

WOW! This new design features the *impossible* – you can now “*walk through the conveyor*” and *penetrate the interior of the Carousel* for the first time ever! Nearly any configuration is possible and because you can walk inside the Carousel, the Dishwasher can be placed against the wall for the first time in the history of carousel dishwashing! Auto-Rack can be used with any rack type dishwasher make or model, either new or existing!

Auto-RACK is the **cleanest** rack conveyor ever designed and impervious to chemicals and detergents. The high grade plastic guide ways are tolerance machined for a self-cleaning fit around the conveyor chain.

The wide open design of the conveyor chain allows water to pass right through and because the conveyor chain travels through the dishwasher it's always clean and sanitary.

Placing the washer against the wall opens floor space previously used by the rack machine and carousel which until now had to be placed at or near the middle of the room! **Visit www.k-flex.us to see our full range of foodservice conveyors and related technology.**
